PRIME DENTISTRY

Know Your Choices. The Prime Difference.

Dr. Dhiren Agrawal
DMD, FICOI, FAGD

Not all full-arch implant treatment is the same. Ask these questions — here's how we answer.

10+ Years	500+	5,000+	1,000+
locally owned private practice	full arches by Dr. Agrawal	implants placed	five-star Google reviews

ASK ANY IMPLANT PROVIDER	THE PRIME DIFFERENCE
Will I need messy impression trays?	**No.** We use the latest **3D digital scanning** — no traditional impressions.
Are my surgery and teeth designed for my mouth?	**Yes.** Your implant surgery and your teeth are **digitally planned and designed to fit your mouth.**
Will I leave with teeth the same day?	**Yes.** Your temporary teeth are **3D printed the same day in our on-site dental lab.**
What if my temporary teeth break?	We keep a **spare 3D-printed set** and your **digital design file** on hand, so we can replace them **the same day**. You are never left without teeth.
Do I get to approve my smile before the final teeth?	**Yes.** After about 4 months of healing, we make a **second temporary** so you can approve the look, fit, and bite before your final teeth are made.
Are final zirconia teeth included?	**Yes — for every patient.** A **zirconia final prosthesis** is included in our fee.
Is there one price for everything?	**Yes. One flat fee** covers the entire procedure, from surgery to your final zirconia teeth.
Who actually performs my treatment?	**Your dentist.** Your entire procedure is performed by the dentist — it is **not delegated to assistants or lab technicians.**
Will my provider still be here in the years ahead?	We are a **locally owned private practice** that has served The Villages area for **more than 10 years**, and we plan to be here for your follow-up care.
